

## + Plasticolors® DH Colorants

### Pigment Dispersions for Plasticizer Containing Systems

Plasticolors® DH pigment dispersions for plasticizer containing systems consist of organic and inorganic pigments suspended in DINCH, a non-phthalate C9 plasticizer.

#### ► Application

Chromaflo Technologies DH pigment dispersions have been specifically developed for cast elastomer, vinyl, caulk/sealant and cast polymer applications. They can also be used for urethane reaction injection molding, urethane foam and urethane integral skin applications.

#### ► Properties

A list of standard DH dispersions is included on the reverse of this page. On request other pigment dispersions can be added to the system to support individual needs. Along with these standard colors, Chromaflo Technologies offers custom color matched blends. Custom color matching is available with special consideration for pigment selection. Pigments can be selected for a variety of requirements, including weathering, UV stability, food contact, non-heavy metals, low abrasion and cost considerations. If you require a pigment chemistry that is not included please contact us for other options available.

#### ► Packaging and storage

The DH pigment dispersions are available in a variety of packaging. Containers should be tightly sealed when not in use. This will prevent the absorption of atmospheric moisture and minimize the chance of airborne contamination. Containers should be stored in a manner as to protect them from extreme temperatures (0-45°C).

Material should be mixed prior to use. The Shelf life of the product is 24 months from the date of manufacture.

#### ► Our services

Chromaflo Technologies Europe supplies pigment pastes and chemical dispersions in Europe, North Africa and the Middle East. Manufacturing and technical support is provided from our Maastricht site in the Netherlands.

Our technical professionals are available to support you with your inhibitor, thickening and color requirements.

Our dedicated sales managers are your point of contact for any queries you have. Apart from direct contact with our sales managers, we have set up a broad network of distribution partners to enhance local support. A large palette of standard colors, custom color matched blends and toll manufacturing can be offered.

Contact us to learn more about our chemical dispersions and pigment pastes for your application. Information on the product portfolio in other regions can be provided on request.
